

WORLD WAVESKI SURFING TITLES 2022 - PRIORITY NOTIFICATION SYSTEM

The priority system will be used at World Waveski Surfing Titles 2022 and is the first time it has been used at a WWST event. Once again we strongly urge all contestants to read the rule book, especially the section on priority. The WWST 2022 Priority Judge is from the WSL circuit and will be at the riders briefing to answer any questions. The riders briefing will be held directly after speeches at the opening ceremony.

LiveHeats has just released a priority module which we will be using, every update the priority judge makes on his tablet will show automatically on the TV screens shown below and will also be visible to spectators with the priority number shown in a circle above their name.

ELECTRONIC SYSTEM (Preferred)

Our first choice will be to use two screens with the sequence and colors as shown above. The numbers will remain static with colors changing underneath them as rider priority changes. A working example will be shown at the riders briefing.

In the event of a system failure, screens not being visible due to glare or a five man heat we will revert to the manual system below.

MANUAL SYSTEM

Functionality will be exactly the same as the electronic system, numbers will remain fixed and the colors above them will change as rider priority changes.
